

Testimonial on Salt and Scale, Port Douglas, Jan 04

Hi Phil,

How is the salt water treating your several acres of lawn and gardens now that you have used it for about a month or so, I hope you have some feed back for me on the results?

Regards

Paul Pearce

www.hydrosmart.com.au

Hi paul,

all appears great in the areas were my water pipes are not near power cables or electric motors, but we have had good rainfull over the past 3 weeks and this is helping things along as well as the hydrosmart system, so it is hard to tell how much advantage the system has given, however in the first week of watering thru your hydrosmart system we did notice an instant new growth of lawn, remember my lawn was brown and full of salinity, then the rain came and I have not watered with the hyrosmart since, we also started using the water into my swimming pool which was calcified so bad the pool walls and rock features were looking disgusting, and now the calcium is disappearing and my walls are looking half good and I expect at the rate of improvement we will have clean walls and rocks once again, thanks to your hydrosmart system, so I am very imprested and happy as I tried everything to remove the calcium and I was at a point of jack hammering my pool walls and re rendering, so the system looks like it has saved me a lot of money in the future.

Regards Phil Matthews
