Dear Sir/Madam,

RE: TESTIMONIAL

Gildera Nursery recently installed the Hydromaster 80 in our Eucalyptus Globulus Seedling Nursery and we have found the following improvements since the installation of the Hydromaster: -

- Algae problems have ceased completely
- There has been a big improvement in Moss control
- Due to the high calcium content in our natural water supply, we have found a dramatic reduction of scale deposits
- There has also been an improvement of nutrient uptake and we are therefore obtaining better health in our seedling plants, including no scolding effects on the leaf

Gildera Nursery is experiencing a vast improvement in the development of our seedlings since the installation of the Hydromaster 80 and would recommend it to other nurseries.

Yours Sincerely,

Terry Scanlon
Gildera Nursery
