Hydrosmart International Pty Ltd
259 Fullarton Road
PARKSIDE SA 5063

We grow approximately 30 acres of strawberries in Mt Barker SA. We installed a Hydrosmart unit on our bore due to salinity problems. The water quality gradually increased to 1500ppm. Plants were starting to suffer in the summer months. There was leaf burn, poor growth and low fruit yields.

When the unit was installed in December 1999, the plants responded immediately with appearance vigor and increased fruit yields. Salinity problems are a thing of the past.

I highly recommend the Hydrosmart System to anyone who is having salinity problems in any farming industry.

Sincerely,

George Piliouras
