TESTIMONIAL ON HYDROSMART SYSTEM

I originally made an enquiry to the Pure Water Shop in December 1997 for help regarding experiencing “white spots” on my black Porsche after washing.

Their recommendation was to have a Hydrosmart Water Conditioning System installed along with a back-washable carbon filtration system at my home, to service mains pressure cold water supply to the whole house and swimming pool.

Positive results began to show immediately and I am delighted to have found such an easy solution to my problem.

I no longer have the white spotting on my car and having softer healthier water supplying my swimming pool and household has been an added benefit to my family and friends.

There has been no on-going costs regarding maintenance to the system and indeed has cut down on the use of chemicals for my swimming pool.

I am only too happy to recommend the Hydrosmart Water Conditioning System for others considering these types of applications.
