Werribee south  
Vic 3030

Dear Paul,

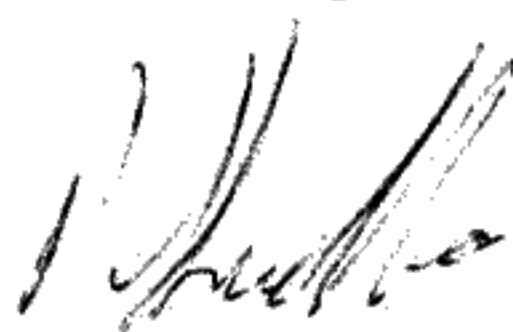

When I bought the hydro smart in 2004  
I had mixed feelings about if the unit would work.

Having crops of Lettuce, Cauliflower, broccoli,  
cabbage & onions With poor quality bore water-3200  
PPM sodium chloride, I had no other option.

To my surprise the quality of the produce improved  
greatly, lettuce had no tip burn good colour & great vigour, the soil  
did not compact due to the sodium chloride and all other crops  
looked magnificent.

It is the best thing I have purchased

Kind regards
