Dear Chris

Re: Hydrosmart Water Conditioner

Since installing the Hydrosmart Water System to my bore in 2009 I have noticed several benefits in my Vineyard:

1. The release of calcium scale and iron oxide from irrigation filters and pipe work
2. Increase in vine canopy and general plant health and vigour
3. No signs of salt stress
4. Earlier ripening of grapes – higher sugar levels earlier
5. Prevention of further salt and calcium deposits
6. Ability to use my bore water

Thank you for your time and expertise in assisting us with the system

Yours sincerely

JOHN JENKE
